

Suneel Rajavaram has worked with Centre for Affordable Water and Sanitation Technology (CAWST) as a Global Water, Sanitation, and Hygiene (WASH) Advisor since 2012. As a Senior Global WASH Advisor, he focuses on serving clients in the region of South Asia and Middle East for CAWST. Suneel has a master's degree in civil engineering (Gujarat, India), a post-graduate diploma in rural management (Anand, India), and a post-graduate certificate in international project management (Humber College, Toronto, Canada). He has 20 years of experience in irrigation, water, sanitation, and hygiene sectors, and has provided training and technical support for water and sanitation projects in numerous countries including: Afghanistan, Bangladesh, Cambodia, Canada, Ethiopia, India, Malawi, Nepal, Pakistan, South Sudan, Sri Lanka, Sudan and United States of America.

Kerry Black is an Assistant Professor and Canada Research Chair (Integrated Knowledge, Engineering & Sustainable Communities), in the Center for Environmental Engineering Research and Education (CEERE) and the Department of Civil Engineering, at the University of Calgary. She received her PhD from the University of Guelph with research focused on sustainable water and wastewater management in Indigenous communities. She received her B.A.Sc from the University of Toronto, and her M.A.Sc from the University of British Columbia, in Civil Engineering. Her focus is to engage in a cross-disciplinary research platform, incorporating technical civil and environmental engineering design and research, with policy and socio-economic components, focusing on sustainable infrastructure for healthy and resilient Indigenous communities. Over the past 12 years, she has worked extensively with Indigenous communities and organizations. She has experience in the academic, public, private and non-profit sectors, employed in technical, scientific, policy, and management roles. She has worked in policy positions with the Government of Canada, the Assembly of First Nations, as well as technical engineering roles. The majority of her experience has included working with and for Indigenous communities on urgent and pressing infrastructure issues across Canada. Her cross-disciplinary research has been featured in both engineering and social science journals. Dr. Black is a strong advocate for increasing diversity in science and engineering, sustainability initiatives and programs, and community development, including her work with Indigenous communities.
