

19 March 2021

Karen Arts
Co-founder, Board of Directors
Network of Networks

Dear Karen,

The Standard Operation Procedures (SOPs) for the Network of Networks were reviewed and revised. This process was completed by the undersigned on March 19, 2021.

This letter confirms the SOP contents reflect the current clinical trial regulatory environment in Canada. In addition, it was confirmed there is compliance to the applicable USA and ICH regulations and guidelines, when applicable. Please note the compliance status of these SOPs could be invalidated with any changes to their content.

References for most SOPs include, but are not limited by, Part C, Division 5 of the Food and Drugs Act and Regulations, Health Canada GUI-0100, Canadian Natural Health Products Regulations, Canadian Medical Device Regulations, ICH E6(R2), applicable Health Canada guidelines and federal/provincial privacy regulations.

The recommendations and suggestions included reflected the current best practice or industry standard.

All applicable SOPs should be reviewed for continued compliance as new clinical trial regulations and/or guidelines come into force by Health Canada and other regulatory agencies. It is recommended to continue with your bi-annual review of all SOPs.

Thank you for the opportunity to work with you.

Kind Regards,

Kim McDonald-Taylor, MSc, CRPC
Clinical Research and Quality Assurance Consultant
