Select which challenge program(s) your research aligns with:

- Pandemic Response
- Materials for Clean Fuels
- High-throughput and Secure Networks
- Artificial Intelligence for Design
- Disruptive Technology Solutions for Cell and Gene Therapy
- Aging in Place
- Internet of Things: Quantum Sensors
- Arctic and Northern
- Applied Quantum Computing
- Low Carbon Built Environment
- Construction Sector Digitalization and Productivity
- Critical Battery Materials Initiative

In the official language of your choice, please provide a brief, plain-language summary (250 words English, 300 words French) of the research being proposed. Using simple terms, describe the nature of the work, why and to whom the research is important, anticipated outcomes, and the manner in which this research serves to increase the scientific and scholastic attainment.
