

Bee Energy

Graphene: The Material of the Future

Bee Energy is a graphene manufacturing company, a University of Calgary spin-off, producing high-quality graphene.

Conductive

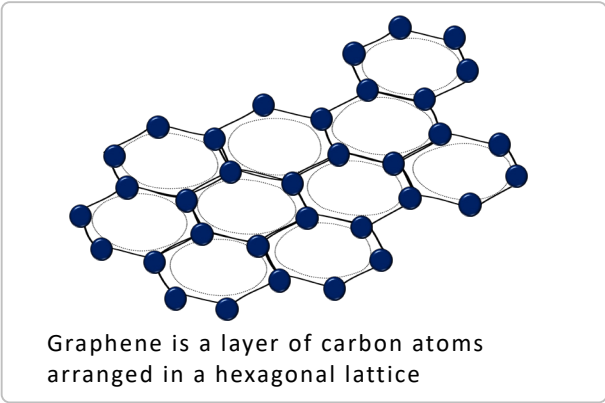

High electrical conductivity 35% > copper

Light

One of the lightest known materials

Strong

200 times stronger than steel

Thin

1 million times thinner than human hair

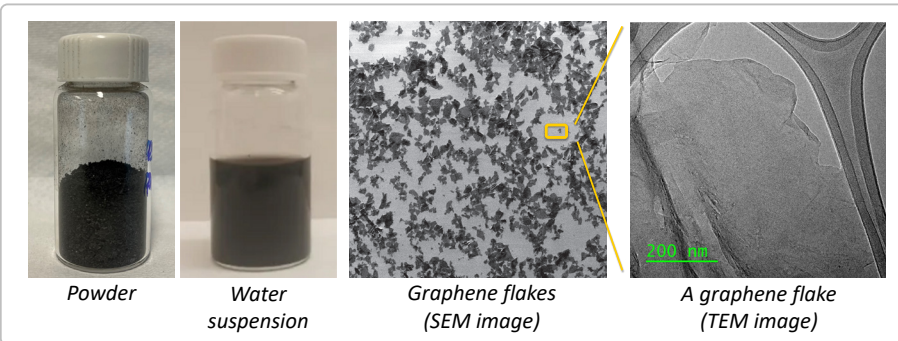

Flexible

Low density of each sheet makes it very flexible

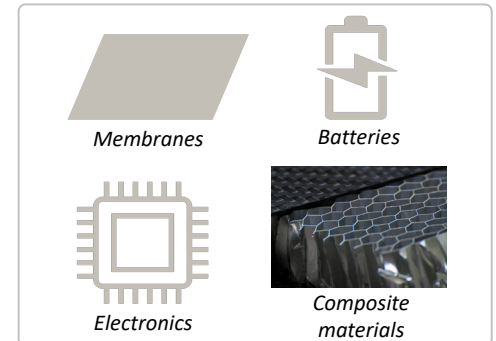

Transparent

Nearly transparent to visible light

Our Graphene Products

Graphene Applications

Our Team
