

Are you struggling with unclear practices for ESG - sustainability assessment and strategy construction?

TOSSA is here to help

What is TOSSA?

- A commercial software package for ESG+ (environmental, social and governance) providing automated triple-bottom line assessment of products/ technology/ corporate operations covering economic, environmental, and social aspects.
- Produces optimal assessment solutions for ESG and sustainable decision-making based on international-well recognized life cycle standards.

TOSSA Features

TOSSA Impact Framework

At the center of our sustainability and ESG score is our Impact framework, which includes >30 sustainability indicators that align with one or more of the SDGs and encompass all potential environmental, social or economic impacts related to a life cycle company's activities.

What can your company do with TOSSA?

- Assess and report on your ESG performance based on consistent life cycle standards
- Connect your sustainability performance to Sustainable Development Goals (SDGs)
- Compare your sustainability performance with national - industry and science-based thresholds
- Compare different alternatives and/or identify sustainability hotspots

Be among the first users of TOSSA and improve your ESG and sustainability performance.

TOSSA Sustainability services include providing customized assessments for companies, ESG and LCSA advising through consultancy services:

- Support your company's ESG rating performance and sustainability goals
- Develop cost-effective solutions for any sector
- Empower your decision-making process, mitigate social risks and reduce the environmental footprints of products and services
- Calculate and assess the social and sustainability impacts of your products, helping you to take the right decisions for your business and build actionable holistic strategies to improve your sustainability performance
